DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group II, claims 10-23 in the reply filed on 7/14/2006 is acknowledged. The traversal is on the ground(s) that search and examination of entire application can be made without serious burden. After further careful consideration, examiner is persuaded by the arguments and therefore the restriction requirement is now withdrawn and claims 1-23 will be examined.

Allowable Subject Matter

1. Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-23 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claims 1, 10, and 12, "first and second storage capacitances which are charged to positive and negative power supply voltages and connected to a source and drain of said transistor to store the data signal as analog drive voltages of positive and negative polarities, respectively". The closest prior art Nakai et al. (6,072,454) discloses first and second capacitances having opposite polarity charges, however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 571-272-7676. The examiner can normally be reached on Monday through Thursday from 7:00 A.M. to 5:30 P.M.
